

Diploma In Mental Health Nursing

POLYTECHNICS
MAURITIUS

OVERVIEW

There is a rapid and extensive paradigm shift of Psychiatry Nursing/Mental Health practice into social and community Psychiatry, General Hospitals and Preventive Mental Health Programmes. This necessitates a need for psychiatric nurses who can adapt to and master health issues of today and apply modern psychological, psycho-physio-social understanding in all phases of Psychiatric Nursing practice and research.

In order to maintain a high standard in Psychiatric Nursing practice, nurses require a specific training in the field so as to acquire the relevant knowledge, skills and attitudes to practice safely, confidently and efficiently. Our Diploma in Mental Health Nursing prepares you to be at the heart of action as a registered professional Mental Health Nurse. It will enable the nurses to achieve the educational purposes both in theoretical and clinical context in order to be in line with the registration requirements of the Nursing Council of Mauritius.

Our modern campus situated at Pamplemousses in the North of Mauritius, offers you a state of the art Campus with modern technological facilities and replicated Skills Lab for simulation-practice. You will surely feel comfortable to know that we work in collaboration with the Mauritius Institute of Health under the aegis of the Ministry of Health and Wellness.

DURATION

18 months | Part-time | 1 Full Day per Week
